

Squeeze Tools

Hydraulic Squeeze Off for Heavy Duty Applications

APPLICATIONS

- HDPE Pipe
- MDPE Pipe
- Lay-Flat Pipe

BENEFITS

- No damage to pipe
- Pipe returns to original shape
- No jobsite spillage

FEATURES

- 6" IPS to 16" SDR7 range
- Easy to transport sizes
- Hydraulically Actuated

Squeeze-off is a technique used to control the flow of gas or liquid in polyethylene pipe by compressing the pipe between parallel bars until the inside surfaces make contact. The flexibility and toughness of the majority polyethylene pipes allow the pipe to recover from a properly made squeeze-off without a measurable loss in service life.

Hydraulic Squeeze Off
